Short Users Manual

1. Getting Started

To run the program, follow these steps:

- Clone the repository from https://git.fe.up.pt/sgi-meic/sgi-2023-2024/t06/sgi-t06-g10.
- Open the code in your preferred integrated development environment (IDE).
- Click on “Go Live” to launch the program in your web browser.

2. User Instructions

The game starts with a menu where you can choose the difficulty level, your tractor, and the autonomous tractor. After selection, the race begins with a maximum velocity of 100 km/h.

Controlling Your Tractor:

- Use the W key to accelerate.
- Use the A and D keys to turn left and right, respectively.
- Use the S key to decelerate.
- Press the Space key to pause the game.

Obstacles:

If you collide with the multicolor cube, choose one obstacle between a wheelbarrow and wood. Place the chosen obstacle at a point on the track. The placed obstacle has a functionality: if you collide with it, your maximum velocity decreases by half (50 km/h) for 4 seconds.

Power ups:

If you collide with a star, your velocity can increase to a maximum of 200 km/h for 4 seconds.

Track Boundaries:

Going out of the track reduces your maximum velocity to 50 km/h.

Goal:

Complete three laps to win the race.

Enjoy the game!
